Global Fluoropolymers Market – Products, Technologies and Applications

The report reviews, analyzes and projects the global market for Fluoropolymers (PTFE, PVDF, FEP, PVF, ETFE, PFA/MFA, ECTFE and PCTFE) for the period 2012-2022.

Published: June 2016
Report Code: CP042
Pages: 588
Charts: 408
Price: $5760 Single User License, $9360 Enterprise License

SUMMARY

Fluoropolymers' exceptional properties, such as outstanding chemical resistance, weather stability, low surface energy, low coefficient of friction, and low dielectric constant, have attributed to their widespread usage in sectors such as chemical processing, electrical & electronics, automotive, building & construction and medical among others. Global fluoropolymers demand is attributed mainly to the robust growth in the developing regions and also continued economic recovery in the developed nations that drives industrial investment and growth in construction activities. PTFE is the largest fluoropolymer in terms of volume and value. However, melt-processable fluoropolymers such as PVDF, FEP, ETFE and ECTFE are forecast to record fastest growth during the analysis period, owing to the significant demand from emerging applications such as photovoltaic modules and architectural membranes among others.

The report reviews, analyses and projects the Fluoropolymers market for the period 2012-2022 globally and the regional markets including North America, Europe, Asia-Pacific and Rest of World. The regional markets further analyzed for 12 independent countries across North America – The United States, Canada and Mexico; Europe – France, Germany, Italy, Russia and the United Kingdom; and Asia-Pacific – China, Japan, India and South Korea. Global volume consumption of Fluoropolymers, standing at 223.2 thousand metric tons in 2012, is forecast to be 281.6 thousand metric tons in 2016 and is projected to reach 402 thousand metric tons by 2022 at a CAGR of 6.1% between 2016 and 2022. Asia-Pacific is the largest volume market for Fluoropolymers globally, forecast to be 126.6 thousand metric tons (45% share) in 2016 and is also likely to post the fastest 2016-2022 CAGR of 7.4% and reach a projected 194.4 thousand metric tons by 2022.

The global Fluoropolymers market report analyzes the fluoropolymer product types comprising Polytetrafluoroethylene (PTFE), Polyvinylidene fluoride (PVDF), Fluorinated ethylene propylene (FEP), Perfluroalkoxy (PFA/MFA), Polyvinyl fluoride (PVF), Ethylene tetrafluoroethylene (ETFE), Ethylene chlorotrifluoroethylene (ECTFE) and Polychlorotrifluoroethylene (PCTFE). The report also analyzes the key end-use sectors of fluoropolymers including Chemical Processing, Electrical & Electronics, Mechanical/Industrial, Automotive & Transportation, Building & Construction and Others. The global markets for the above mentioned product types and end-use sectors are analyzed in terms of volume in metric tons and value in USD for the aforementioned analysis period. This report also provides the comprehensive market analysis of each fluoropolymer product segment by end-use sector.

The report provides comprehensive data on fluoropolymers production capacities which includes production capacity by manufacturer, by fluoropolymer type, by country and by manufacturer’s production plant.

This 588 page global market report on Fluoropolymers includes 408 charts (includes a data table and graphical representation for each chart), supported with meaningful and easy to understand graphical presentation, of market numbers. This report profiles 17 key global players and 39 major players across North America – 6; Europe – 7; and Asia-Pacific – 26. The research also provides the listing of the companies engaged in manufacturing and processing of Fluoropolymers. The global list of companies covers the address, contact numbers and the website addresses of 211 companies including subsidiaries.
SAMPLE COMPANY PROFILE

HALOPOLYMER OJSC (RUSSIA)
Leningradskiy Prospect, MonArch Business Center, 31A, Building 1, 15th Floor, 125284, Moscow, Russia
Phone: +7 (495) 725-44-00
www.halopolymer.com

Business Profile
Moscow, Russia-based HaloPolymer OJSC stands among the leading global producers of fluoropolymer products and the sole Russian producer of specialized fluoropolymers (melt processable fluoroplastics and fluoroprenes). The company is also the largest regional producer of freons and a leader in producing inorganic chemicals, such as acids, alkalis and salts. As of 2011, HaloPolymer’s production capacity of polytetrafluoroethylene (PTFE) stood at 12,700 tons per annum, with exports of the same accounting for 80% to over 30 countries, including the USA. Apart from PTFE, HaloPolymer produces small amounts of other fluoropolymers such as FEP and PVDF. The company’s enterprises include HaloPolymer Perm OJSC, HaloPolymer Kirovo-Chepetsk LLC and HaloPolymer Logistics LLC.

Product Portfolio
HaloPolymer product portfolio includes PTFE, FEP, ETFE, PVDF and fluoroelastomers.

PTFE
- Fluoroplast-4 – easily lumping white powder
- Fluoroplast-4A – free flowing white powder
- Fluoroplast-4D – suspensions, powders and fine powders
- Fluoroplast-4M – modified PTFE powders
- Fluoroplast-4TG - pre-sintered PTFE powder
- PTFE-4D and PTFE-4MD suspensions

Other Fluoropolymers
- Fluoroplast-2M – modified PVDF granules and powders
- Fluoroplast-32L – PVDF copolymer powders
- Fluoroplast-42 – PVDF copolymer granules and powders
- Fluoroplast-4MB – FEP granules and powders
- Fluoroplast-40 – ETFE granules and powders
- Fluoroplast-40M – modified ETFE granules and powders

SAMPLE TABLE/CHART

2017 Global Fluoropolymers Volume Market Share (%) by Geographic Region – North America, Europe, Asia-Pacific and Rest of World

Global Market for Fluoropolymers in Building & Construction Sector (2016 & 2022) by Fluoropolymer Type – PTFE, PVDF, ETFE, PVF and ECTFE in Metric Tons

KEY PLAYERS PROFILED

Comprehensive Reports on Individual Fluoropolymer Products

Polyvinylidene Fluoride (PVDF) – A Global Market Overview

The remarkable properties and versatility of PVDF resins have made them an indispensable component in a wide array of application areas. Global volume consumption of Polyvinylidene Fluoride (PVDF), standing at 35.5 thousand metric tons in 2012, is forecast to be 46.1 thousand metric tons in 2016 and projected to reach 69.2 thousand metric tons by 2022 at a CAGR of 7% between 2016 and 2022. Over the same period, global value demand for PVDF is likely to post a faster CAGR of 7.5% and reach a projected US$1.4 billion by 2022 from a forecast US$899.5 million in 2016.

Fluorinated Ethylene Propylene (FEP) – A Global Market Overview

Global demand for fluoropolymers has been witnessing considerable growth and as major worldwide economies are on the path to recovery, the need for specialty, melt-processable grades such as Fluorinated Ethylene Propylene (FEP) has also been growing rapidly. This polymer is finding extensive use in areas such as wire and cable, photovoltaic (PV), aerospace and automotive markets.

Polytetrafluoroethylene (PTFE) – A Global Market Overview

PTFE’s vast potential applications in developing world such as China, India, Russia and other emerging countries is a key opportunity for PTFE manufacturers, that would be converted into market demand by new product and application development. Increasing use of novel products like modified PTFE and expanded PTFE in applications such as chemical processing, electrical & electronics, medical devices and filtration is set to increase the global demand for PTFE in the coming years. Micronized PTFE is estimated to be the fastest growing product form owing to....

About Industry Experts

Industry Experts values the most updated and accurate market research and industry analysis to provide unique market research reports for a broad range of industry verticals including Automotive, Transportation, Healthcare, Pharmaceuticals, Food & Beverages, Chemicals, Plastics, Materials, Consumer Goods, Retail, Biotechnology, Construction, Manufacturing and Other industries. Our research reports help our clients to identify and resolve topical issues by providing a complete picture of the market in their respective industry sectors. The Company's rich collection of market research reports enable the companies to explore market drivers; forecast the future market; and to formulate the right strategies at the right time.

Industry Experts' leading edge publications makes the life easy for corporate strategists, investors, analysts and researchers, start ups, consultants, financial and banking executives, academicians and many more. The company also provides customized research reports to cater the needs of the industry.
